

ScreenSense Power BI Dashboard Outline

1. Dashboard Page 1 — Screen Usage Overview

Purpose: Provide a quick summary of overall screen usage patterns among users.

KPIs Cards:

- Total Users
- Average Screen Time (hrs)
- % of High Usage Users
- % of Risk Users

Charts:

- Histogram – Distribution of Screen Time
- Donut Chart – Exceed vs Not Exceed Limit
- Column Chart – Age Group vs Avg Screen Time
- Donut Chart – Screen Time Category Split

2. Dashboard Page 2 — Device & Behavior Analysis

Purpose: Understand how device usage and activities vary across users.

Charts:

- Stacked Bar Chart – Age Group vs Device Type
- Treemap – Activity Distribution
- 100% Stacked Bar Chart – Educational vs Recreational Usage
- Clustered Bar Chart – Device vs Avg Screen Time

3. Dashboard Page 3 — Time-Based Analysis

Purpose: Compare usage behavior across different time patterns.

Charts:

- Bar Chart – Weekday vs Weekend Screen Time
- Stacked Column Chart – Day Type vs Activity
- Line Chart – Screen Time Trend
- Area Chart – Peak Usage Periods

4. Dashboard Page 4 — Cohort & Segment Insights

Purpose: Identify high-usage groups and important segments.

Charts:

- Heatmap – Age × Device × Screen Time
- Stacked Bar Chart – Age Group vs Usage Level
- Matrix Table – Age × Location × Device
- Highlight – High Usage Cohorts

5. Dashboard Page 5 — Health & Risk Analysis

Purpose: Analyze risk levels and health impact due to screen usage.

Charts:

- Bar Chart – Screen Time Level vs Risk Level
- Column Chart – Health Severity Distribution
- Stacked Bar Chart – Digital Balance vs Risk Level
- Scatter Plot – Screen Time vs Risk Score

Slicers:

- Age Group
- Gender
- Location Type
- Device Type
- Screen Usage Level
- Risk Level
- Day Type
