

Power BI Dashboard Outline (ScreenSense Project)

1. Dashboard Page 1 — Overview of Screen Time

Purpose: Provide a quick summary of overall screen time patterns among children.

KPIs Cards:

- Total No. of Children
- Average Daily Screen Time (hrs)
- % of high Screen Time user
- Percentage of Risk User

Charts: 1

- **Histogram** – Distribution of Average Daily Screen Time
- **Donut Chart** – Kids Exceeding vs Not Exceeding Recommended Limit
- **Column Chart** – Age Band vs Average Screen Time

2. Dashboard Page 2 — Device & Activity Analysis

Purpose: Understand how device usage and activities vary across children

Charts:

- **Stacked Bar Chart** – Age Band vs Primary Device
- **Treemap** – Activity Distribution
- **100% Stacked Bar Chart** – Digital Balance
- **Clustered Bar Chart** – Device vs Average Screen Time

3. Dashboard Page 3 — Weekday vs Weekend Analysis

Purpose: Compare behavior changes between weekdays and weekends.

Charts:

- **Bar Chart** – Day Type vs Average Screen Time
- **Stacked Column Chart** – Day Type vs Activity
- **Line Chart** – Screen Time Trend

4. Dashboard Page 4 — Cohort & Segment Analysis

Purpose: Identify high-usage groups and key segments.

Charts:

- **Heatmap** – Age Band vs Device vs Average Screen Time
- **Stacked Bar Chart** – Age Band vs Screen Time Level
- **Matrix Table** – Age Band × Location × Device

5. Dashboard Page 5 — Habit & Risk Analysis

Purpose: Understand behavioral patterns, risk levels, and health impact.

Charts:

- **Bar Chart** – Screen Time Level vs Risk Level
- **Column Chart** – Health Severity Distribution
- **Stacked Bar Chart** – Digital Balance vs Risk Level

Slicers :

- Age Band
- Gender
- Location Type
- Primary Device
- Screen Time Level
- Risk Level
- Day Type
